

On all pages

- The background is a image with a fixed position and the main section is in the middle taking up 60%, 80% or 100% of the width (depending of the screen size)
- The header is fixed on the top of the page with a shadow and a navigation bar. Each element of the navigation bar changes color when hovered over.
- At the bottom of the main section is a link to the next page
- The footer is on the bottom of the page after all the content.
- I used media queries to make the website responsive for medium and small devices eswell. They change the size of the header and its content, rearrange pictures in the gallery and adjust the size of the margin of the main section.

Zuzana Klucikova

Welcome to my webpage!

This is my first assingment and here you will find some more information about me like my [interests](#), [CV](#), a small [photo gallery](#) and lastly a [contact form](#).

Welcome page:

- The Main section includes 2 headings, a profile picture with a caption, and a paragraph with higher links in the text leading to the relevant pages.
- The profile picture gets slightly bigger and has a shadow when hovered over

About me

I am a student from Slovakia, currently studying informatics at IMC Krems in Austria. I have always enjoyed learning new things, from exploring the world of technology to picking up new languages or skills.

When i am not behind a computer, you will most likely find me outdoors. I love traveling, whether its exploring big cities or escaping to the mountains. Hiking, climbing and spending time in nature are some of my favorite ways to recharge while also showing the beauty of the world around us and giving me inspiration that i try to capture through photography and, occasionally, painting.

At home i have a few pets who mean a lot to me and you can see them in the small photo gallery on the next page. They are a big part of my life and one of the reasons i always look forward to returning home.
