

On all pages:

- The background is an image with a fixed position and the main section is centered. Taking up 60%, 80% or 100% of the width (depending on the screen size).
- The header is fixed at the top of the page with a shadow and a navigation bar. Each element of the navigation bar changes color when hovered over.
- At the bottom of the main section, there is a link to the next page.
- The footer is on the bottom of the page after all the content.
- I used media queries to make the website responsive for medium and small devices as well. They adjust the size of the header and its content, rearrange pictures in the gallery and adjust the margin of the main section.

Zuzana Klucikova

Welcome to my webpage!

This is my first assingment and here you will find some more information about me like my [interests](#), [CV](#), a small [photo gallery](#) and lastly a [contact form](#).
